## SUBJECT: RCRA PART B PERMIT APPLICATION

In December 1984, we were advised by DOE/HQ that the Environmental Protection Agency (EPA) had informed the Office of Management and Budget that they intended to call for the Resource Conservation and Recovery (RCRA) Part B Permit for the Rocky Flats Plant (RFP) in FY 1986. It is expected that the Colorado Department of Health (CDH), who assumed authority over the RCRA program from EPA in November 1984, will maintain or possibly accelerate this schedule.

In anticipation of the legal call for the Part B Permit from CDH, the attached announcement was prepared and will soon appear in the COMMERCE BUSINESS DAILY. This is the first step in an intensive program to achieve and maintain compliance with RCRA regulatory requirements. Administration of RCRA contract activities has been assigned to John A. Campbell (HS&E Application Technology). Review, approval, and control of these activities will continue to be the responsibility of both Environmental Affairs, under my authority, and Waste Operations Management, with cooperative support from John Hayden (Waste Operations) and Gary Potter (HS&E Application Technology).

Preparation of the RCRA Part B Permit application will require timely support from almost every organization on plantsite. Upon approval, compliance with permit requirements will be an ongoing management responsibility. It is a Plant and HS&E goal that all RCRA requirements be met or exceeded. Achieving this goal will require your continued interest and cooperation.

If your organization would like to receive more information regarding RCRA requirements and related plant hazardous waste management plans and activities, please contact either Gary Potter (x4283) or myself at X7006.

**R - ARCHITECT - ENGINEER SERVICES****HAZARDOUS WASTE MANAGEMENT (A/E) SERVICES FOR THE DEPARTMENT OF ENERGY'S ROCKY FLATS NUCLEAR WEAPONS PLANT OPERATED BY ROCKWELL INTERNATIONAL AT GOLDEN, CO.**

Rockwell International Corp. contemplates establishing a Basic Ordering Agreement (BOA) for Engineering Services to assist in major hazardous waste management projects. Rockwell anticipates negotiating a number of fixed price tasks under such BOA over an approximate two year period. Such tasks will include but not necessarily be limited to the preparation of a Resource Conservation & Recovery Act (RCRA) Part B Permit application, and Response to comments from the Colorado Department of Health (CDH) and the Environmental Protection Agency (EPA). The project may also involve preliminary investigation for future activities concerning the Comprehensive Environmental Response, Compensation and Liability Act, or other hazardous waste management activities. The initial task consists of preparation of a Part B Permit application as specified in the RCRA. Preparation of the Permit application will require extensive review of existing hazardous wastes and transportation, storage and disposal procedures currently being utilized at the Rocky Flats Plant. The Permit shall be prepared in accordance with all applicable criteria for submission to the Department of Energy (DOE), the CDH, and the EPA. The RCRA Permit application shall be completed within 6 months after notice of award. Each response will be evaluated using the following general criteria listed in descending order of importance:

- (1) Demonstrated experience and expertise, including specific experience and qualifications of key personnel, in hazardous waste management activities, preparation of RCRA Part B Permit applications, and mixed low-level radioactive and hazardous waste.
- (2) Ability to assign an adequate number of qualified personnel.
- (3) Past experience and record of performance on contracts with private industries and Federal Government agencies with respect to such factors as:
  - a. quality of work
  - b. ability to meet schedules.
- (4) Location of an office in the general geographical area of the project and familiarity of local area and Government agencies.

Interviews will be conducted with the leading candidates based on the results of the initial evaluations. Firms desiring consideration shall submit completed standard forms 254 and 255, (2 copies each), as described in note 63. This is not a request for proposal. Those responses postmarked within 21 days of this announcement will be considered for selection.

All responses should be sent to:
